(54) SYSTEM AND PROGRAM FOR TAKING
EMERGENCY COUNTERMEASURE TO
TRAFFIC ACCIDENT

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a system and a program for taking emergency countermeasures to a traffic accident for automatically announcing the occurrence of any accident to a necessary contact destination, and for promoting accurate and urgent countermeasures to the contact destination.

SOLUTION: A accident countermeasure computer 10 is provided with a processor 101, a GPS navigation system 102, a vehicle sensor system 103, and accident countermeasure system information 104 or the like. The processor 101 is provided with a function for judging the level of the accident based on information acquired by the GPS navigation system 102 and the

vehicle sensor system 103, and for preparing the accident countermeasure system information 104. Also, this system is provided with a function for automatically transmitting the accident countermeasure information 104 through the Internet 100 to a police station computer 20, a fire station computer 30, and a property insurance computer 40 and a function for automatically making a contact with a family portable telephone 50.
